RESIDENTIAL VALVE 4600 MECHANICAL AND 4600 ELECTRONIC SXT

Technical specifications:

- Operating flow rate 1 bar dP - 4.5 m³/h
- Backwash flow rate 1.8 bar dP - 1.6 m³/h
- Cylinder attachment: 2" 1/2 8 NPSM
- Input/output connections: 1" on request 3/4"
- Operating pressure min 1.4 bar - max 8.5 bar
- Operating temperature min 4°C - max 82°C (65°C volumetric version)
- Power supply voltage 230 VAC
- Power supply frequency: 50 Hz
- Valve body material: Bronze
- Softening cylinder: 6"-12"

For hot water

Accessories included in the softening version

HW Dispenser Pipe Ø 27 x 1950 - Code FLA21675

Air Check HW 3/8" - Codice FLA23473

1" Brass Yoke - Code FLA13398-10

Filter cylinder 9"-12" (DLFC 3/4") - 13"-21" (DLFC 1")

MECHANICAL 4600 VALVE WITH ACCESSORIES

Valve for hot water applications. The valve body is made of brass. The volumetric version can be used with water up to 65°C. The chronometric version can be used up to 82°C.

- Adjustable brine
- Start Chronometric Regeneration: 2 days
- Volumetric regeneration start: delayed

4600 SXT ELECTRONIC VALVE WITH ACCESSORIES

Valve for hot water applications. The valve body is made of brass and is ideal for softening and filtration applications, with a fully programmable electronic board to control the regeneration cycle and regeneration start.

- Backlit display
- Full programmability of the regenerative cycle
- Regeneration start: chronometric, immediate volumetric, delayed volumetric, manual
- Service and self-diagnostic indicators
- Advanced programming options, including the possibility of programming up to 6 regeneration cycles with independent time adjustment
- Possibility of double backwash

INDUSTRIAL VALVE 3150 TIMER NXT

Valve for industrial applications with electronics that fully manages the regenerative cycle, all cycle parameters and possible communication in the system of up to 4 cylinders.

- Two-line LCD display with 16 characters
- Connection of up to 4 valves
- Possible configurations: System 4,5,6,7 and 9

Available signals:

- Remote starter
- Inhibiting the start of regeneration
- Programmable relay
- Three levels of programming: User, Installer, Diagnostics

Technical specifications:

- Operating flow rate 1 bar dP - 22 m³/h Head mounting version
- Operating flow rate 1 bar dP - 22 m³/h Side mounting version
- Backwash flow rate 1.8 bar dP - 24 m³/h Head mounting version
- Backwash flow rate 1.8 bar dP - 25 m³/h Side mounting version
- Cylinder attachment for overhead mounting: 4" 8 UN
- Inlet/outlet connections 2" BSP
- Operating pressure min 1.8 bar - max 8.5 bar
- Operating temperature min 1°C - max 43°C
- Power supply voltage 230-24 VAC transformer
- Power supply frequency 50 Hz
- Valve body material: Bronze
- Softening Cylinder 24"-42" (TOP Mount) - 24"-60" (Side Mount)

INDUSTRIAL VALVE 3900 TIMER NXT

Ideal valve for use in industrial and multi-column system applications. The valve is designed with a double piston in order to optimise the management of the system from a flow rate point of view. The control part is protected against splash water by a sealing cover with gasket to achieve IP44 protection.

The advanced electronics fully manage the regenerative cycle, all cycle parameters and the possible communication in the system of up to 4 cylinders.

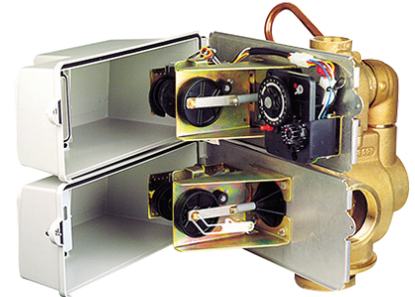

- Two-line LCD display with 16 characters
- Networking of up to 4 valves
- Possible configurations: System 4,5,6,7 and 9

Available signals:

- Remote starter
- Inhibiting the start of regeneration
- Programmable relay
- Three levels of programming: User, Installer, Diagnostics

Technical specifications:

- Operating flow rate 1bar dP - 57 m³/h
- Backwash flow rate 1.8 bar dP - 24 m³/h
- Cylinder attachment for overhead mounting: Flange 6
- Inlet/outlet connections 3" BSP
- Operating pressure min 1.8 bar - max 8.5 bar
- Operating temperature min 1°C - max 43°C
- Power supply voltage 230-24 VAC transformer
- Power supply frequency 50 Hz
- Valve body material: Bronze
- 30"-60" softening cylinder
